Quality and Performance

Ga'roll Engineering
"Expert in roller technology"

ISO 9001:2015 Certified company

www.gajroll.com

GAJROLL ENGINEERING provides a complete range of rollers for the every industry like **TEXTILE INDUSTRY, PLASTIC INDUSTRY, PAPER INDUSTRY, STEEL INDUSTRY ETC...**

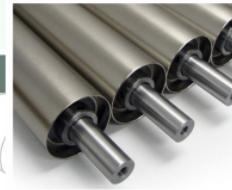

About us

We are working in roller manufacturing field since 1983 as Shree Bhavani Industries started by Mr. Jethabhai Panchal with a motive of manufacturing power looms rollers. Later on, after working successfully on the project, Shree Bhavani Industries expanded its work in roller Manufacturization by adding Gajrol Engineering to its family which is presently run by Jethabhai's son Mr. Dharmesh J Panchal.

Under the vision of of Mr. Dharmesh J Panchal, the company is successfully achieving its goals in rollers market. At present, Gajroll Engineering is recognized as a leader in industrial roller market for converting , Textile , Plastic packaging , steel & metal printing and non woven markets.

To a company, customers are its legacy on which thought Gajroll Engineering works. To understand the need of each customer and provide them with best service is what we focus on. We adapt our know-how according to their wishes and our aim is pointing out the characteristics that will make the final product become distinguished. We act in such a way that the high quality of our services is accompanied by a reasonable cost. We continue investing in the education of human potential, in new technologies and in know-how aiming at the continuous improvement of services and products.

Maximum Capacity : Ø524mm x 6000mm Length

WATER JECKETED ROLLER (Cooling Roller)

Cooling Roll have hard chrome plated or rubber surface or as per customers requirement. Cooled water passing through its Rotary joint to cools the roller surface area of the Roll. Cooling Roll cools the contact area that touches the web materials. There are different type internal construction of Cooling Rolls like single shell, double shell type and external construction of cooling roll like mirror finish HCP, stainless steel jacketed and rubber coated roller.

CHILLED SUPER FINISH (MIRROR FINISH) HCP ROLLER

Maximum Capacity : Ø524mm x 6000mm Length

ROLLER

ALUMINUM ROLLER

We are engaged in manufacturing a range of aluminium rolls that are widely demanded among our worldwide clients. Fabricated using best grade material, these rolls high temperature tolerance, less wear & tear and are highly durable. Available in different sizes, these are also coated to prevent from corrosion resistance. We can also produce holo type and endsaft type aluminium rollers.

STEEL ROLLER

We are engaged in manufacturing a range of SS end shaft type roller that are widely demanded among our worldwide clients. Fabricated using best grade material, these rolls high temperature tolerance, less wear & tear and are highly durable. Available in different sizes, these are also coated to prevent from corrosion resistance.

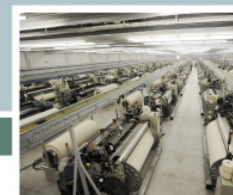

SUPER FINISH ROLLER

(Mirror Finish) Hard Chrome Plated Roller

We have serve to achieve high gloss mirror finish subsequent to the grinding operation. We use special abrasive tools to reduce peak to valley height and impart high gloss mirror finish to the roll resulting in a surface finish of 0.005 micron ra value on the roll.

HARD CHROME PLATED ROLLER

Hard chrome plating is a hard electro deposit of chromium which is widely used because of its properties like high hardness, wear resistance, corrosion resistance and low coefficient of friction.

SS CLADDED ROLLER

Expert in SS cladding roll Available from minimum 90mm dia to 550 mm dia Smooth finish no brush accuracy as per your requirement. We provide End Shaft type & Holo type cladding roll. SS cladding roller help to protect against rust and it's also available in affordable price.

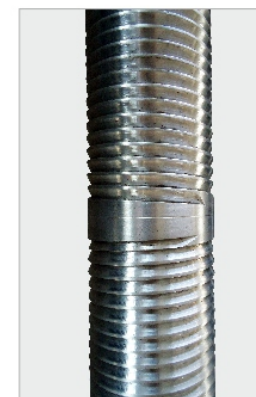

SCROLL ROLLER

Scroll Rolls offered by us are wrinkle removing rolls from web material used for manufacturing, processing, Coating and converting. Our Scroll Rolls are available in different material such as Ebonite, M.S, stainless steel, aluminum.

WIRE TYPE

GROOVE TYPE

Maximum Capacity : Ø524mm x 6000mm Length

ROLLER

RUBBER ROLLER

We offer a wide variety of rubber and polyurethane compounds as well as complete product solutions. Selection of roller type and coating material depend upon the application and the web material.

EBONITE COATED ROLLER

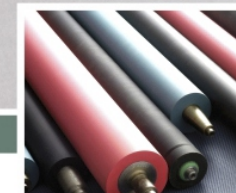

We offer a wide variety of ebonite coated compounds as well as complete product solutions. Selection of roller type and coating material depend upon the application and the web material.

PU ROLLER

These polyurethane rollers are capable of functioning for long hours. This polyurethane roller is specially designed and developed to meet all the needs of our international clients.

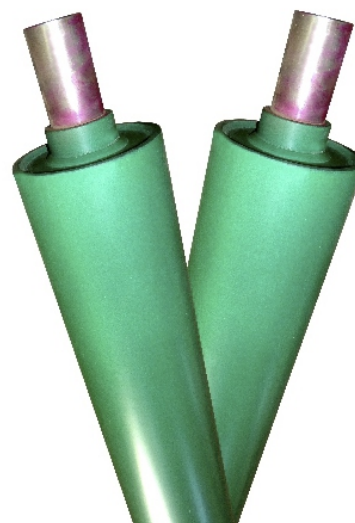

NIP ROLLER

Nip rolls are powered rolls that are used to press two or more sheets together to form a laminated product. The high pressure created at the nip point brings the sheets into intimate contact, and can squeeze out any bubbles or blisters that might cause a defective bond. Nip rolls are sometimes called laminating rolls, laminations, squeeze rolls, pinch rolls or even wringers. Gajroll Engineering builds a number of different types of nip roll units. Design features are built into each model of nip rolls to make it fit the particular needs of different applications.

TEFLON COATED ROLLER

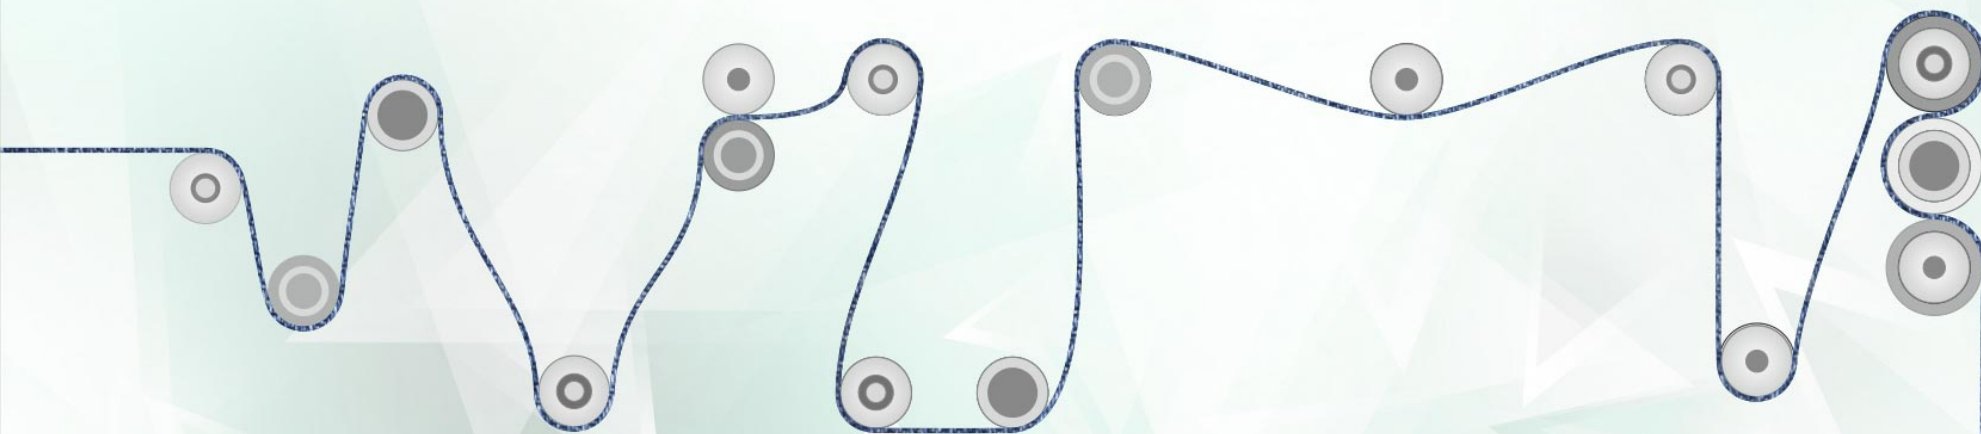

We are engaged in manufacturing a range of teflon rolls that are widely demanded among our worldwide clients. Fabricated using best grade material, these rolls have high temperature tolerance, less wear & tear and are highly durable. Available in different sizes, these are also coated to prevent from heat resistance.

ADJUSTING FRAME

We are actively engaged in offering a qualitative range of Adjusting Frame. Known for its sturdiness and longer functional life, this Adjusting Frame is available in different specifications as per the demands of the customers. The offered Adjusting Frame is tested in terms of quality before delivering to customer's end. Our offered Adjusting Frame is manufactured using the best quality raw material and modern techniques.
